

Characteristics

- Bright (LED), high-quality images.
- Quiet and quick chart selection.
- 41 different charts (including: red/green and polarized lenses, binocular).
- Balance testing, stereoscopic vision, fixation testing, fusion testing, and object inequality testing.
- 2~8 meters projection distance
- Adjust icon brightness remotely through mobile app.
- User programmable programs (2 sets of programs, each with up to 30 charts).
- Easy to connect with other optometry devices.

Technical Data

- | | |
|-----------------------|--|
| • Chart | : 41 charts (including red/green and polarized) |
| • Projection Distance | : 2~8m |
| • Chart Magnification | : 30 times (5m) |
| • Chart Size | : 333(length)×221mm(width) |
| • Chart Speed Average | : 0.15 seconds |
| • Light Source | : LED lamp |
| • Auto Off Function | : Auto shutdown after 10 minutes of inactivity |
| • Voltage | : 100-120V~200-240V50/60Hz |
| • Power | : 60W |
| • Program | : 2 sets of programs, each with a maximum of 30 charts |
